DESIGN

CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/4.

Fully upholstered suite, wooden base frame

Seat upholstery structure: zig-zag springs, Dacron, polystyrene foam VW 40, Diolen

Back upholstery structure: polystyrene foam, 70% plumes, 30% silic. hollow fiber, Diolen

UPHOLSTERY VERY CASUAL

With casual upholsteries you are rather sitting „in the sofa“ than on it, the upholstery snuggles. A very casual upholstery is characterized by a smooth, soft surface. The covers are intended showing a distinctive curly image and an extended wrinkling on seat, back and armrests already in new condition. With high quality upholsteries with bay quilting as applied a flexible mixture out of loose filling material enables a point adaptation to the body. So that the contents don't „move around“ the fillings are worked in bays. According to the cover they come more or less apparent Sitzmarks are due to model and design typical.

Slight differences in seat firmness with add-on groups are according to construction and therefore constitute no grounds for complaint.

BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

LEGS

Plastic glider optionally available with a height of:

- 5 cm (for sh 43 cm)
- 7 cm (for sh 45 cm)

COVERING MATERIALS

You may find the information concerning the specific properties of the covering materials on the sample labels.

INDICATIONS OF DIMENSIONS AND REQUIREMENTS

All the values given are approximate values: dimensions in centimetres, material requirements in metres, leather requirements in square metres.

FUNCTIONS

I FUNCTIONAL HEAD PIECE

The head piece is manually adjustable by a ratchet mechanism that allows different positions.

II FUNCTIONAL BACK

The back is adjustable independently of the head piece by a ratchet mechanism that allows different positions.

III SEAT ADJUSTMENT

It can be chosen between elements with motor-driven seat adjustment (code M) and elements with manual seat adjustment (code X).

With elements with seat adjustment the leg part and the back are adjustable for a comfortable seat- and lying position (TV arm-chair function). The back is put backward and the leg part will be moved forward.

This function is not possible with all daybeds.

- **MOTOR-DRIVEN** (code M): Via motor the leg part can be adjusted forward as well as the back backward. The handling is effected by sensors that react to touch, are formed as buttons and are fixed to the cover (TOUCH IT Technology).
- **MANUAL** (code X): By displacement of the body weight backwards the leg part can be adjusted forward and at the same time the back leans backward.

Attention: Do not sit on the extended foot rest!

The extended foot rest must not be used as seat. The joint is not designed for use with the entire weight of the body (max. 30 kg). Please don't stand up until the foot rest is retracted completely. Otherwise your risk a permanent damage of the functional mechanism.

MANUAL BACK ADJUSTMENT WITH DAYBEDS

The manual back adjustment with daybeds is applied by displacement of the body weight backwards. The back is adjustable independently of the functional head piece.

SEAM

Depending on the model, the seam on leather covers may be different from fabric covers, especially on fitted items. Decorative leather seam (as double lapped felling or double seams) may be omitted depending on the model according to suitability of the fabric covering material.

Edition 12.07.2018

Errors and amendments excepted. Our General Terms and Conditions are effective.

CONTRAST STITCHING

The seam construction diagram and the thread size are defined due to the model.

With leather covers the production is carried out either **with contrast stitching** or with a **thread (tone on tone)** matching the leather in terms of colour. Therefore in such cases the finish must be chosen.

By processing with contrast stitching **the best matching colour of the contrast stitching** was chosen for each leather colour. It will be worked automatically while a certain colour of contrast stitching is not explicitly indicated on the order. More for it in the general sales information.

The below displayed combinations of seam colour and leather colour are recommended, exemplary assignments of the 6 available colours of contrast stitching.

LIGHT GREY 0321

BEIGE 1222

NOUGAT 0281

GREY 0415

DARK BROWN 1002

BLACK 4000

Unfortunately with fabric- and microfiber covers contrast stitching is not possible.

Exception fabric 13-BISON:

With this fabric it can be chosen between a production with contrast stitching or with a thread matching the fabric in terms of colour (tone-on-tone).

ORDER CHECK LIST

Please pay attention to the following issues respectively to complete indications when ordering:

- **combination**
- **covering material**
- with leather covers production **with or without contrast stitching**
- **height of leg** for sh 43 cm or 45 cm
